Section Level Responses					
Expected Action	Action Type	Respondent	Action Taken	Date	Resource Request
AHAT >> Dental Hygiene >> DNTL1510 >> Section 20 - Fall 2021					
I wonder what might be the reasons students are below expectations, and what if I made these changes to improve the outcomes? Please only consider the changes you have control over. Are additional resources needed? If so, please describe using the Resource Request drop down.	Reflection	Anonymous	Early assessment reveals that some students have not adapted to course load, nor refined preparation and study habits.	2021-12-27

I wonder what might be the reasons students are below expectations, and what if I made these changes to improve the outcomes? Please only consider the changes you have control over. Are additional resources needed? If so, please describe using the Resource Request drop down.	Reflection	Anonymous	There is simply too many students (10) per lab session and not enough radiology rooms (4). This makes it difficult for students to get the time they need to achieve competency. This would require a new facility, which is not feasible at this time.  The alternative would be breaking the students up into groups of 5, which would require an additional 4 hours of my time in lab. Logistically, this may not be possible either.	2022-01-12

I wonder what might be the reasons students are below expectations, and what if I made these changes to improve the outcomes? Please only consider the changes you have control over. Are additional resources needed? If so, please describe using the Resource Request drop down.	Reflection	Anonymous	I think more activities in class that focus on memorization would be helpful. Also, adding in more conditions/complications associated with the different anatomical areas of the body; such as conditions which affect the nervous system.	2022-01-12

AHAT >> Dental Hygiene >> DNTL2132 >> Section 20 - Fall 2021					
I wonder what might be the reasons students are below expectations, and what if I made these changes to improve the outcomes? Please only consider the changes you have control over. Are additional resources needed? If so, please describe using the Resource Request drop down.	Reflection	Anonymous	Results of the assessment are consistent with the overall performance of this particular cohort. During all three semesters, grades and assessment results were primarily average, with only a few student's performing above (mastery) and a few performing below (introductory) the developmental level. Evaluation tools in this course are intended to be instructional rather than challenging, reinforcing information through repetition. Results are not unexpected.	2021-12-27
